

Nomex.

**ONE ONE THOUSAND
TWO ONE THOUSAND
THREE ONE THOUSAND**

Nomex.

How far can you get
IN 3 SECONDS?

**PROBABLY
NOT FAR ENOUGH.**

FIRE IS UNPREDICTABLE. NOMEX® IS NOT.

Let's face it, you can never know with certainty when a fire will spark, how hot it will burn, where it will spread or how long you'll be in danger. Because fire is such a wild card, DuPont™ Nomex® becomes the best bet. Nomex® fiber is proven, predictable and yes, safe.

And there are good reasons to be prepared with Nomex®. According to the Bureau of Labor Statistics, 109 workers died from fires in 2010 alone. OSHA reports more than 5,000 are injured in explosions and fires on the job each year. And there's no way to put a number on the pain and suffering serious burns and injuries cause to workers and their families.

PROVEN. PREDICTABLE.

DuPont™ Nomex® thermal technology helps resist the hazards of flash, jet and pool fires - including intense heat and flame. Its effectiveness has been proven time and time again in documented laboratories, field tests and real-life fires. Compared to other materials like fire resistant cotton, it offers the following advantages:

- Nomex® is inherently flame resistant.
- Does not melt or drip and self extinguishes.
- Provides permanent protection that won't wash out or wear away.
- Helps maintain a stable, inert barrier between the fire and skin.
- Works in tough fires. Over 95% of fire fighter turnout gear contains Nomex®.
- Garments made of Nomex® fiber complies with NFPA 2112 Standard on Flame-Resistant Garments for Protection of Industrial Personnel Against Flash Fire.

40 YEARS OF PROTECTING AGAINST ALL TYPES OF FIRES.

DuPont™ Nomex® fiber sets the standards in fire protection around the world for over 40 years. Workers across the manufacturing, chemical and refining industries depend on its thermal protection to help keep them safe. And racecar drivers, jet fighter pilots and firefighters know it by name.

Today the innovation continues, Nomex® products are engineered to deliver protection, durability and more comfortable, cost effective solutions to help keep you safe from hazards such as flash, jet and pool fires with various intensity and duration.

WORKING TOGETHER TO HELP KEEP OUR WORKERS AND YOURS SAFER.

There's more in every fiber of Nomex® than superior, inherent protection. There's a commitment to collaboration. Partnerships with world-class manufacturers. Collaborations with organizations and associations that set the safety standards. And a dedication to building the tools that help give certain workers the best protection for the hazards they face every day. DuPont™ Nomex® fiber — weaving together 40 years of safety and predictability.
