U.S. Patents 5,647,412 - 7,673,658

Fluid transfer leaks and spills can be a significant health and environmental liability, as well as costly from lost time and material.

When connections in bulk fluid transfer areas, dispensing areas, and waste collection areas are compromised and cause leaks, the liquid drips and spills are captured in our patented containers saving time and money.
Expensive spill clean up is eliminated.

Our spill containment systems are available in four sizes:

3 gallon, 6 gallon, 9 gallon and 29 gallon capacity.
Made in the USA

SPILL CONTAINMENT RESOURCES

SPILL CONTAINMENT RESOURCES

provides patented products for environmentally conscience liquid spill prevention and containment solutions.

Features

Product features and benefits

- Manufactured with high quality UV & Chemical Resistant Polyethylene and non-corrosive stainless steel bolt & hinges for maximum strength and durability
- Each unit can be locked for added security
- Made in the USA

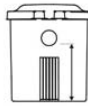

Application

- Great for fluid transfer of most types of liquids and fluids in compliance with Federal Regulations for both spills inside and outside containment areas

Industries served

- General Manufacturing** - most types of industrial fluids and liquids
- Government** - military installations and other government facilities
- Food & Beverage Processing**
- Agriculture** - farms of all types
- Transportation** - air, rail, and automotive
- Health Care** - hospitals and health care facilities, pharmaceutical companies
- Retail Trade**
- Education** - K-12 and University/College
