# Don't Buy Gas Detectors

There's a better way to do gas detection.

Buy a gas detector, and you'll get ...

- ▶ a gas detector.

With **iNet**, you'll get ...

- ▶ help from the Gas Detection People ...
- ▶ a safer workplace ...
- ▶ cost savings.

All gas detectors go into alarm. And, they all need maintenance.

So finding the right gas detector is not your most difficult decision. That's the easy part. The hard part is deciding what to do when your people are exposed to alarm conditions ... when they're most at risk. And, what do you do when gas detectors go down and you're waiting for them to be serviced?

iNet solves these common gas detection problems. It keeps your people safe by providing visibility into alarms, exposure and usage. It keeps gas detectors working without costly and time-consuming maintenance. And you don't have to buy them. So why do it?

Discover iNet. Discover a better way to do gas detection.

# The first 4-gas detector you don't have to buy!

*There's a better way to do gas detection with iNet and MX4.*

## **MX4** **iQUAD™**

### The ideal 4-gas detector

- Monitors O<sub>2</sub>, combustible gas, and 2 toxic gases including CO, H<sub>2</sub>S or NO<sub>2</sub>
- Extremely small size, weighs only 180 grams
- Lithium-ion or alkaline battery operation

**Using the MX4 with iNet is a better way to do gas detection.**

#### **It gives you help from The Gas Detection People.**

Let us handle your gas detection program. Gas detection is probably not core to what you do. But, it's all that we do. It's what we love to do.

#### **It gives you a safer workplace.**

On average, gas detectors go into high alarm once every ten days. How many high alarms did your facility have? iNet gives you information and tools to fix problems before they happen.

#### **It gives you cost savings.**

The list price is only part of a gas detector's total cost. You have to maintain it. You have to wait for it to be serviced. iNet eliminates unnecessary ownership and maintenance costs.
